

# DIY Zoning: Schematics

by Vadim Tkachenko

## 1. Coming soon

This is a sad omission, but there's not too much yet. Sorry folks, this is being worked on. So far, whoever knows what we're talking about, will be able to recreate all the things without stretching the imagination too far, but everybody else will just have to wait.

If you can help to create them, though, you are [more than welcome](#).

## 2. 1-Wire sensor and R/C Servo controller

Thanks to Nic van der Walt, some schematics are now available:

- [1-Wire servo controller & temperature sensor schematic](#);
- [1-Wire servo controller & temperature sensor PCB layout](#);
- [DS2450 based sensors](#).
